

September 23, 2021 Atlanta Chapter Meeting

“A Synopsis of the INCOSE 2021 International Symposium”

***David Takacs
Chapter President***

Abstract

The INCOSE 2021 International Symposium was a virtual event broadcast on Zoom. It was a full Symposium (Mon-Thu) with daily Plenaries, Paper Presentations, Panels, and Tutorials. The theme was “Accelerating through Adversity” which was of course a reference to the global pandemic. My objective will be to give you a taste of what I saw and encourage you to participate in future Symposiums. INCOSE members and employees of INCOSE Corporate Advisory Board (CAB) companies will also have access to most of the Symposium artifacts/papers.

Speaker Bio

Dave is the President of the Atlanta Chapter and is a Systems Engineer with Lockheed Martin in Marietta, GA. He received a BS IMGT degree from Georgia Tech, an MBA from Lindenwood College and a Graduate Certificate in Systems Engineering from Kennesaw State University. Dave is a Systems Engineer in the Air Mobility and Maritime Missions Line of Business (C130, C5, P3) at Lockheed Martin. Prior to this position, he worked several other programs at LM (F-22, ADP). And prior to LM, he was a Systems Engineer for McDonnell Douglas in St Louis, MO (F/A-18, ATF, YF-23, A-12). Dave is an INCOSE ESEP and is an INCOSE Certification Application Reviewer.
