

Press Release

INCOSE Calling All Systems Fall Series

SAN DIEGO (25 AUGUST 2023) – *The International Council on Systems Engineering (INCOSE) is pleased to announce the Fall Series of Calling All Systems, A Platform of Awareness about Systems Engineering. Back by popular demand, the upcoming series will once again host a compelling array of panel discussions and bring together thought leaders from around the globe.*

INCOSE is delighted that Dassault Systèmes is the 2023 Calling All Systems sponsor. We have also collaborated with Dassault Systèmes to deliver an insightful session on the theme of 'Models in Space' in this coming series.

Calling All Systems aims to provide a series of forums throughout the year, facilitating discussion on key issues. These concise sessions have been designed to respect attendees' busy schedules while ensuring vibrant debates with access to leading experts in various sectors, domains, and disciplines. These discussions will also cast a spotlight on working groups within these areas.

The success of the first two sessions earlier this year was resounding. With over 1,200 registrations in total, the sessions drew the participation of 770 attendees from more than 30 countries.

Honor Lind, Marketing and Communications Director of INCOSE says *"I'm excited to announce our Fall Series of Calling All Systems. This platform continues to unite global thought leaders through insightful panel discussions. In collaboration with our series sponsor, Dassault Systèmes, we are once again bringing you engaging sessions that push the boundaries of systems engineering. The impressive outcomes from our earlier sessions this year, which saw involvement from over 30 countries, really highlights how strongly this initiative connects."*

The Fall Series consists of the following panels:

'Sustainability' - Sponsored by IBM on September 19 2023 at 11am EST/UTC -4

'Models in Space' – Sponsored by Dassault Systèmes on October 18 2023 at 11:30am EST/UTC -4

'FuSE' – Sponsored by Spec Innovations on November 17 2023 at 11am EST/UTC -4

To register and learn further details about these panels, visit the [Calling All Systems page](#) of the INCOSE website. More information will also be available in further press releases prior to the panel sessions.

About the International Council on Systems Engineering

The International Council on Systems Engineering (INCOSE) is a not-for-profit membership organization that promotes international collaboration in systems engineering practice, education, and research. INCOSE's mission is to "address complex societal and technical challenges by enabling, promoting and advancing systems engineering and systems approaches." Founded in 1990, INCOSE has more than 65 chapters and over 21,000 members and associates worldwide. For additional information about INCOSE visit www.incose.org.
